

High-pressure Ultra Clean unit

HPE-280-110-20L-Sx

Ultra-high-pressure equipment for optimal surface preparation applications.
Application areas: paint stripping, bare-metal surface preparation, material removal.

General Features:

- Complete skid for equipment mounting
- Booster pump for water pre-charging and high-efficiency filtration
- Tank with minimum level indicator and automatic water replenishment
- Inlet water temperature sensor
- Inlet water pressure sensor
- Three-stage water filtration (300-10-5 μ m)
- Electrical panel with LED controls and emergency button
- Integrated flow/pressure control inverter
- Maximum pressure safety device with calibrated rupture disc
- Ultra-high pressure gauge, 4000 bar series
- Remote pneumatically controlled ultra-high pressure bypass

Optional:

- Manual/automatic spray guns and hoses
- Automatic floor cleaning carts
- Diesel engine
- Complete external soundproof enclosure

Basic specifications:

Max continuous pressure:	2800 bar
Max flow rate:	20 lt/min.
Installed electrical power:	112 Kw
