

High-pressure Ultra Clean unit

HPE-250-120-Sx-Cx

High pressure cleaning Equipment for optimal surface preparation with use of water only.

Application item: Industrial cleaning - Paint stripping

Water jet cleaning machine - Electrical series 2500 bar

Technical characteristics:

- SKID for complete support of all the equipment
- Booster pump for water pre-charge and high efficiency filtration
- Tank with min. level reading and automatic water reintegration
- Temperature sensor control (water in)
- Pressure sensor control (water to charge)
- Filtering system with 3 stages filtration (300-10-5 micron)
- Electric cabinet with led controls and emergency bottom
- Max pressure safety device with special calibrated valve
- Special manometer (all inox safety device) for pressure reading
- By-pass with pneumatic remote piloting (on-off interventions)

Optional:

- Manual gun for cleaning operations - flexible hose to gun
- Electric cabinet with integrated inverter (pressure selection)
- Trolley for automatic cleaning operation of ground surface
- External and complete soundproofed carter (shown in picture)
- Electrical cabinet dedicated to specific plants (shown in picture)

Esempi di impianto completo di componenti specializzati forniti in aggiunta nell'ambito della realizzazione di impianti su misura

Advanced equipment HPE-250-120-Sx-Cx:

Max continued pressure:	2500 bar
Max delivery:	27 lt/min.
Electrical power used:	120 Kw
