

High-pressure Ultra Clean unit

HPE 250-90-S8

Features:

- Complete skid for equipment mounting
- Water pre-charge booster pump
- Water tank with minimum level sensor
- Inlet water temperature sensor
- Inlet water pressure sensor
- Three-stage water filtration (300-10-5 μm)
- Electrical panel with LED controls and emergency button
- Maximum pressure safety device with calibrated rupture disc
- Ultra-high pressure gauge, 4000 bar series
- Ultra-high pressure bypass with remote pneumatic control

Technical Specifications HPE 250-90-S8:

Max pressure:	2500 bar (continuous operation)
Max flow:	20 lt/min
Electric motor:	123 hp (90 kw)
Water tank:	300 lt
Dimensioni skid:	2800 x 1250 x h 1400 mm

Optional:

- panel with inverter for precise control of working pressures and digital display of values on the panel
